Projects

Equilo - Gender Equality Tools

We have developed a web application where user can explore gender equality analysis and information based on Country, Sector and Subsector accordingly them subscription plans.

Marigold Health

I have created a web application where users can connect with each other, chat, create groups, and join groups accordingly. Mentors have the ability to send tasks and assignments to users. Users can earn rewards upon completing tasks or assignments, which they can then redeem

IOT Device Management web application

Our web and mobile applications offer remote control functionality for devices. The web application features a live dashboard showcasing real-time device information and historical data. Additionally, users can set up rules and receive alert notifications for their devices.

OTA management for IOT devices

We have developed a web application that allows companies to release Over-The-Air (OTA) updates to all devices, categorized by device type and tenant criteria.

Online MCQS Test web application

Users can log in with valid credentials to access the exam platform, where they can take exams and view their results. Administrators have the capability to schedule exams, as well as create exam questions utilizing the question bank
